FENDT

Fendt Connect
The Fendt Telemetry Solution

**It's Fendt.** Because we understand agriculture.

Telemetry basic package

The telemetry basic package includes all the components to use Fendt Connect and Fendt Smart Connect (optional):

- ACM (AGCO Connectivity Module) box
- Fendt Connect (App & Web)
- 3-year licence

optional:
- Fendt Smart Connect (free of charge)

The ACM box integrated in the tractor is the heart of the telemetry. It is used to read out relevant machine parameters and
- transmit them to Fendt Connect via mobile communications
- or send them to Fendt Smart Connect via Wi-Fi (optional, free of charge)

Fendt Connect

What is Fendt Connect?

Fendt Connect is the central telemetry solution for Fendt machines. With Fendt Connect, machine data is collected and evaluated so that farms and contractors can monitor, analyse and optimise the condition and use of their machines. Thanks to mobile data transmission, current machine data can be called up regardless of location - via PC, tablet or smartphone.

What information does Fendt Connect provide?
- Current position and route travelled
- Fuel consumption and AdBlue level
- Speed and working hours
- Machine utilization
- Fault codes
- Pending service intervals
- etc.

The ACM Box is a prerequisite for using Fendt Connect. It is used to read out relevant machine data and transfer it to the Fendt Connect app or web application. The data is transmitted via mobile communications, for which a licence is required. The telemetry basic package includes the ACM box, the Fendt Connect app and web application as well as a 3-year licence.

Installation

Log in and connect your machine - in four easy steps:

1 www.fendtconnect.com

3 Add machine

- „My Fleet"
- „Add machine"
- Confirm account

(Requires ACM box)

English ▾ 👤 Fendt ▾

+ Add machine

2 Create an account

- „Register"
- Enter email address
- Confirm account

USE FENDT CONNECT

Fendt Smart Connect

What is Fendt Smart Connect?
With Fendt Smart Connect, machine parameters can be visualized on the iPad. In addition to mobile communications, the ACM box is equipped with its own Wi-Fi, which enables data transfer to the free Fendt Smart Connect app. With Fendt Smart Connect, the driver has an additional display area that can be individually adapted. There is no permanent data storage.

What information can be displayed via Fendt Smart Connect?
- Engine speed
- Slip
- Fuel and AdBlue consumption
- Engine load
- Lift capacity
- etc.

WiFi

How can Fendt Smart Connect be started?

1 Open Fendt Smart Connect app

2 Select ACM Wi-Fi of the ACM box

Data is visualized in the app

Overview

What are the advantages?

Fendt Connect

- Increased efficiency through better logistics decisions
- Reduction of the input: Monitoring consumption to improve performance
- Maximize uptime thanks to intelligent service schedule planning
- Minimization of downtime: Use of diagnostic support for decision making
- Flexibility: retrieval of current machine data from anywhere

Fendt Smart Connect

WiFi

- Free additional display area in the cabin
- Intuitive operation thanks to familiar hardware and operating logic
- Full data control - no permanent data storage
